How to Get Access to the RUSH Research Portal (RRP)

What is the RUSH Research Portal (RRP)?

The RUSH Research Portal (RRP) serves as both a central platform for many research functions at RUSH and as a repository for research-related announcements and resources. **Access to the RRP is essential for anyone involved in research at RUSH.**

You can access a limited number of resources from the Home page of the RRP without an RRP account. This includes the Getting Started folder, which contains resources for those looking to get involved in research at RUSH.

To access most of the available resources and utilize the core functions of the RRP, including creating and managing a Master Project, you must have an RRP account and log in to the RRP using your RUSH credentials.

How do I get an RRP account?

1. Self-register for the **Research Onboarding Learning Program** on the Learning Hub.

2. Complete all **9 courses** in the Research Onboarding Learning Program.

3. Submit the **RRP New Account Request Form** (sent via email after completion).

4. Log in to the RRP using **RUSH credentials** once access is granted.

What is the Research Onboarding Learning Program?

The **Research Onboarding Learning Program** includes two series of courses bundled together in one learning program.

» **Office of Research Compliance (ORC) Series:** The ORC Series includes six courses designed to educate individuals involved in research at RUSH on the importance of maintaining compliance in their research practices.

» **RUSH Research Portal (RRP) Series:** The RRP Series includes three courses designed to introduce research personnel to the RRP and provide foundational skills on navigating and using the RRP at RUSH.

Research Onboarding Learning Program

Office of Research Compliance (ORC) Series
